

Colleagues,

Thank you for your interest in my presentation: **Discover the Potential of Online Learning**. Together, we will explore how to plan and implement an online learning curriculum for credit recovery and course enhancements. We will discuss how online learning can meet the needs of our tech savvy students and identify growing trends in online learning for the K-12 schools.

As an educator, I have over 14 years of practical experience in instruction, curriculum development and administration. The last eight years have been spent leading a statewide and nationally deployed adult education online learning initiative.

During the presentation, I will use Consumer Education Online as a model of an online curriculum, but the concepts shared will be applicable to all schools and courses. In addition to the handouts and discussion shared during the conference presentation, I recommend the following reading:

- *Keeping Pace with K-12 Online Learning: An Annual Review of State-Level Policy and Practice.*
- *Staying the Course: Online Education in the United States, 2008: The Sloan Consortium*

Note: Since these are lengthy reports, I will not use these as session handouts, but I will gladly email electronic copies if you would like. Email me at ktracey@cait.org.

Finally, the following website has a wealth of reliable and practical resources for developing an online curriculum. <http://www.inacol.org/> (The International Association for K-12 Online Learning.)

I look forward to meeting you at the 2010 Global Education for the 21st Century Conference.

Respectfully,

Kathy Olesen-Tracey
